

**JASON C. WELLS, PE**  
**Vice President/Field Services Division Manager**

Registered Professional Engineer (Civil) - AZ #37893

## CAREER PROFILE

Mr. Wells' career began in 1996 with Speedie & Associates where he worked on a part time basis while attending Arizona State University. From 1996 to 1998, Mr. Wells had varied duties with an increasing level of responsibility, including Laboratory Technician, Environmental Technician, Field Technician, ultimately becoming Assistant Project Manager for Field Services by 1998. In the same year, Mr. Wells received his Bachelors of Science Degree in Civil Engineering, and shortly after was elevated to Field Services Project Manager, where he performed and supervised extensive field and laboratory testing and inspection of construction for many major civil and public works projects, transportation projects, commercial/industrial, school and hospital projects. In 2002, Mr. Wells became a Registered Professional Engineer in the State of Arizona, where he began performing Senior Project Manager duties including the responsibility for the technical review and quality control for the department in addition to continuing his technical and administrative duties within the Field Services Division. Today, Mr. Wells is a Vice President of the firm and provides technical oversight of the field services project managers on a large range of projects as the Division Manager of Field Services.

## PROFESSIONAL EXPERIENCE

Mr. Wells is Sr. Project Manager of the Field Services Division with responsibility for the administration and execution of all Construction Materials Testing and Inspection services performed by the firm with the aid of a staff of 11 professional engineers/geologists and support personnel. It is Mr. Wells' ultimate responsibility for ensuring that adequate personnel and other resources are made available for each project and for the quality and timeliness of Speedie & Associates overall performance.

Since 1996, Mr. Wells has amassed experience in the testing and inspection of a wide variety of structures and infrastructure projects as well as roadway, commercial and industrial development projects, all of which took place while at Speedie & Associates. His responsibilities include but are not limited to the technical review of the field services department, including the oversight of project management, testing methodology, quality control, scheduling, staffing, invoicing, and project sign-off.
